URGENT CARE

Aches, pains and sprains. These are times when care is necessary but not critical. Medical conditions that are not an emergency should be treated in your family physician's office or at a contracting urgent care center. Doctors are available 24 hours a day to help you get the care you and your family need. Their after-hours message will instruct you on how to reach them. **In most cases, non-emergent care is not covered when received in a hospital emergency room.**

EMERGENT CARE

If you have an Emergency Medical Condition such as difficulty breathing, suspected heart attack, uncontrolled bleeding, unconsciousness or severe burns, try to use a **contracting** hospital emergency room. If you choose to go to a non-contracting hospital, your coverage may be limited. Please remember, **Wesley Medical Center and Kansas Medical Center** are not Contracting Providers and your out-of-pocket costs could be substantial.

Please call specific location for hours of operation. For urgent and emergent care outside Wichita, refer to the Provider Directory.
